

## SP-15

The SP-15 is a self-contained 15 liters water tank with battery.

Ideal for small drilling works, no waste of time for connection, and also for outdoor cutting when no water is available.

It turns dust into mud, leaving the operator's field of vision clear and protecting him from inhaling it.

It avoids the manual pumping of traditional tanks and ensures constant pressure and flow.

Directly connected to the tool with brass quick couplings, the SP-15 combines time saving, flexibility and long battery life (4.4Ah battery).

12V converter  
To charge battery in  
vehicles

### Highlights

- **Small and light**
- **Ease of use**  
*no dusts harmful to health and no pumping effort*
- **Self-sufficient**  
*No connections, no leaks*
- **Convenient**  
*no preparation before use  
no cleaning  
avoids the use of long hose lengths*

### Technical data :

- **Capacity** : 15 liters
- **Weight** : 3,6 kg (with battery)
- **Autonomy** : low speed 10h00  
high speed 6h00
- **Battery** : 4,4Ah Li-Ion
- **Flow** : low speed 2 L/mn  
high speed 3 L/mn
